

The Dorwest Story

Dorwest Herbs was founded in 1948, giving us over 60 years specialist experience in companion animals and herbal treatments. We are a third generation family business located in rural west Dorwest.

We are passionate about keeping dogs and cats healthy and happy by using pharmaceutical quality herbal supplements and licensed herbal medicines. Dorwest is the renowned market leader, and a worldwide brand available in over 20 countries outside the UK.

Dorwest Products

We produce the largest range of licensed veterinary herbal medicines in the UK, proven to be safe & pure for over 40 years.

Also a unique range of herbal supplements made to the same exacting standards as our medicines.

We have a medicines licensed premises, trained personnel and even an on-site laboratory, enabling us to have complete control on our products from formulation to manufacture through to packing and distribution.

All our products are made in Britain with herbs sourced as locally as possible from cultivated or sustainable wild sources and no GM ingredients are used.

No unethical animal testing procedures.

We never compromise on quality.

Should you require further advice about our products either:

Joint Problems?

Dorwest 'naturally' has it covered

Your guide to managing your pet's joint problems...
naturally, safely and effectively

Joint Problems?

Follow the chart below to find out the best Dorwest product for your pet's joint problem

Joint problems are extremely common and cover a range of conditions – from a little age-related stiffness to chronic arthritis, or from a minor strain to a more serious joint problem.

All can benefit from either our fully licensed herbal medicines to relieve arthritic symptoms, or from the addition of our high quality dietary supplements to support the joints.

Our treatments can be used on their own or alongside conventional treatments from your vet if required. The chart opposite is a simplified form of the most common problems but is in no way exhaustive.

All our products are specifically formulated for dogs and cats and made in the UK.

With all joint problems it is a good idea to consider these basic points:

- ✓ Consult your vet to identify the problem and for on-going monitoring
- ✓ Ensure your pet is not overweight, as this puts extra strain on the joints
- ✓ Review their diet, as some foods may aggravate the condition
- ✓ Exercise should be gentle and limited to what your pet feels able to do comfortably

"I recently asked for advice regarding my 11 year old Lurcher bitch Tessa, who due to cruciate ligament injury some years ago, was suffering badly from arthritis. She had everything we could think of, acupuncture, hydrotherapy, physiotherapy, magnetic collars & blankets, but despite medication for pain relief, I did not feel that we were controlling the pain enough for her to enjoy life. You suggested Garlic & Fenugreek Tablets and Mixed Vegetable Tablets. After a few weeks I was surprised and delighted to see that for the first time in months she was walking so much better, not trailing behind with her head down and altogether now looks so much happier. I could not believe my eyes and am so pleased, I just had to tell you. Tessa's injury was so extreme that the vet was contemplating amputation almost 9 years ago and keeping her pain free has been a struggle. Thank you very much for your advice, I am over the moon with the result."

E.Howell, Warrington.

Remember we are not vets and do not diagnose. You should always consult a vet if you are concerned about your pets health.

Joint Problems?

Arthritis

Garlic & Fenugreek Tablets

This licensed herbal medicine contains natural anti-inflammatory compounds and is therefore effective in relieving arthritis symptoms and increases suppleness and flexibility. May also have a preventative function in slowing the progress of the disease.

Mixed Vegetable Tablets

This herbal medicine is licensed to treat the symptoms of arthritis and contains 5 active ingredients with over 10 natural analgesics (pain killers) and 20 anti-inflammatory compounds. This superb combination works synergistically to ease joint pain and increase mobility.

(Both medicines are particularly effective when given in conjunction with each other.)

Joint Support

Glucosamine & Chondroitin Tablets

This popular supplement is well known for its ability to maintain joint function by supporting the manufacture of collagen and proteoglycans to lubricate joints, maintain synovial fluid and so sustain mobility and flexibility in the joints.

Cod Liver Oil Capsules

Provides an excellent source of Omega 3 fatty acids and vitamins A & D to assist bone formation and skeletal growth as well as sustaining suppleness of the joints and good circulation. Fish oils are also particularly useful for working dogs as they provide energy which is slow released to give extra stamina.

Post Injury

Symphytum 15C homoeopathic

A homoeopathic remedy prepared from the Comfrey herb, whose old country name is Knitbone. This should be used during the period following injury to help strains and sprains and to support healthy ligaments and tendons.

Glucosamine & Chondroitin Tablets

This popular supplement is renowned for its ability to support joint function by helping the regeneration of cartilage and enhancing the body's ability to manufacture collagen and proteoglycans, essential for lubrication of the joints and increasing synovial fluid, both of which are beneficial following injury or trauma.

If required, any of these products can be used in conjunction with each other
