Dog days

Summer care tips for your pet

Bright eyed and bushy tailed

Ideal products for every lifestage

Natural health

We all want the best for our pets and over the last few years, owners are really looking to maintain good health and use preventatives rather than treating problems as they arise. All Dorwest products are suitable from at least 8 weeks of age but below we have picked some of our favourite products suitable for every life stage of your dog.

You can always rely on our attention and commitment to ingredients, with high quality and purity standards, comprehensive contaminant testing as well as full traceability.

PUPPY

Is there anything better than a new puppy...the fun, the mischief and best of all that puppy smell!

Inquisitive pups often eat things they shouldn't and as they are introduced to new environments, friends and foods occasionally they can suffer from an upset tummy.

Tree Barks Powder

This is a solid favourite (excuse the pun!) of all the Dorwest Team, perfect for soothing the digestion and firming up the motions, it is ideal to always have in the cupboard. Containing just two types of tree bark and nothing else, this really is a natural wonder.

Oatmeal Advance Shampoo

It won't be long until your pup finds something smelly to stand/roll/jump in and this will be your first port of call. This best selling, award winning shampoo contains hydrating oatmeal and calming lavender, it is also pH balanced and free of synthetic nasties, so perfect for your pups delicate skin as well as being a super efficient muck remover!

ADULT

As your pup turns into an adult and the sensible side of your dog takes over (Maybe!) Our ideal recommendations would be our Everyday Essentials for every lifestage (See below). However there are a couple of other products which are perfect for the grown-ups

Roast Dinner Toothpaste

Now is the time to stay on top of dental health as the shiny new adult teeth perhaps start to accrue a little staining and tartar. This tasty toothpaste is coarser than human toothpaste and with it's meaty taste and low foaming texture it is perfect to keep those pearly whites sparkling!

TOP TIP!

If your dog doesn't like a childs toothbrush a little piece of muslin cloth wrapped around your finger is a gentle alternative.

Glucosamine & Chondroitin Tablets

For super active dogs, those that have sadly had a joint issue or those owners who want to ensure their dogs joints are supported as well as possible. This tablet includes high grade Glucosamine hydrochloride which provides the building blocks to manufacture collagen, alongside Chondroitin this is the perfect way to support your dogs joints and keep them active and moving well.

OLDIES

There is something very special about our dogs when they reach their vintage years. Who can resist those grey muzzles and stubborn personalities!

Green Relief Tablets

This herbal powerhouse of a tablet is what our team call the 'Old dog tablet', it is a multi-use product and will relieve symptoms of arthritis, help urinary disorders as well as skin issues. So really is ideal to use alongside our 'Everyday Essentials' below.

Turmeric Tablets

Turmeric has widely documented benefits including supporting the body's anti-inflammatory and pain-relieving processes. This is such a useful supplement for our older ones, when they just need a little bit more support, it really is golden!

ESSENTIALS FOR EVERY LIFE STAGE

Our essentials for everyday life include:
Glucosamine & Chondroitin Tablets, Keepers Mix Powder and Omega Star Shampoo.

Dog days!

Summer care tips for your dog

1. Early walkies

Walk early or late to avoid the hottest part of the day. It may seem obvious but heatstroke can happen very quickly especially in coated breeds.

2. Stay cool

Find new ways to cool your dog. Dogs cool from the bottom up, so lay a wet towel on the ground or invest in a paddling pool.

3. Things that go bang!

Keep **Valerian Compound** on hand if your pet is scared of loud noises, summer thunderstorms and fireworks displays start quickly and this is the perfect quick calming choice.

4. Barbeque dangers

Keep fatty food treats from the barbeque to a minimum, veterinary practices see an upsurge in stomach upsets and pancreatitis during this time of year. It is hard for our canine friends to resist the smells so be extra vigilant.

5. External parasites

Garlic and Pennyroyal Mint are two herbs that external parasites are really not keen on, so why not try giving **Garlic & Fenugreek Tablets** on a daily basis and also using our super minty **Pennyroyal Shampoo** to help create an environment that fleas really don't like!

What allergies?

If your dog suffers from skin issues, follow our 4 step plan for natural relief

1. Bedding

Keep your dogs bed clean by washing at a hot temperature regularly, this will help remove dust mites and any allergens such as pollen which are transferred from the dog's fur.

2. Grooming

Brushing your dog shouldn't be reserved for long coated breeds, regular grooming helps remove dead skin and coat, encourage new skin growth and help air circulate. Don't forget to bathe them using our natural **Oatmeal Advance Shampoo**.

3. Feeding

The skin and coat are visible indicators of health and with a fresh, natural and balanced diet our pets can avoid the junk food and support healthy skin with simple great nutrition.

4. Treatment

Give your dog our fully licensed herbal medicines for skin disorders, **Garlic & Fenugreek Tablets** and **Green Relief Tablets** for a minimum of 1 month to see the full benefit.

Stay connected! We have a really active, friendly social media community. So please share and tag us in your photos and posts, we love to see photos of your pets! Just use **#dorwestdog**
